Climate change is evervones

In order to take meaningful action against climate change, a significant amount of capital needs to flow into impactful mitigation efforts.

250,000

deaths per year are expected to be due to climate change between 2030 and 2050*

\$8.1 trillion

Investment in nature is needed by 2050 to avert a climate crisis*

\$536 billion

per year, or a 4x increase is needed by 2050 to meet climate change targets*

Bringing clarity to global carbon credit markets

Coral provides a simple and transparent solution to make environmental responsibility through carbon offsetting actionable by everyone.

Transparent

Coral uses a public blockchain ledger so buyers have full visibility into exactly what they are purchasing

Accessible

Easy verification of the history and quality of each carbon credit through our platform

Accurate

Comprehensive end-to-end footprint tracking, based on: Greenhouse Gas Protocol Scope 1, 2, 3 emissions standards

Spotlight: our partnership with Nissan FE

Coral is a new platform that facilitates transparency and traceability in carbon offsetting. Nissan Formula E will use Coral's carbon calculator to analyze their emissions in accordance with Greenhouse Gas Protocol Standards to make informed decisions on their likely footprint.

The Coral platform will then provide clear and attributable purchase options for offsetting.
